

CheerMatch Scoring Portal — Manual Test Script

Version 2.0 · QA checklist for admin, judge, coach mobile and API surfaces

- Purpose: a manual, end-to-end test script for the CheerMatch scoring portal. Work top to bottom, or run only the sections touched by a release.
- Environments: test on the preview URL before publishing, then repeat the smoke-critical cases (A1-A3, C2, G4, H6, I3, I6) on production.
- Accounts needed: one admin, two judges (one assigned to an SD/deductions panel), one gym coach with a phone, and one test organization.
- Recording results: mark each case Pass / Fail / Blocked, note the browser or device, and log a defect reference for every failure.

A. Access, Roles & Authentication

ID	Test	Steps	Expected result	Pass / Fail	Notes
A1	Admin sign-in	Go to /auth, sign in with an admin account.	Redirected to /admin dashboard; sidebar shows Dashboard, Events, Scoring Rubrics, Submissions, Judge Broadcast, Settings.		
A2	Judge sign-in	Sign in with a judge account.	Redirected to /judge; judge sidebar and message bell visible; no admin routes reachable.		
A3	Coach sign-in	Sign in with a gym_coach account.	Redirected to /m (mobile coach app); only assigned events visible.		
A4	Invalid credentials	Attempt sign-in with a wrong password.	Clear error toast; no session created; no redirect.		
A5	Password reset	Use Forgot Password, open email link, set a new password.	Reset email received; new password works; old password rejected.		
A6	Admin-set password	Admin > Settings > User Roles > Edit user > set new password. Sign in as that user on web and mobile.	New password works on both web portal and mobile coach app.		
A7	Route protection	While signed out, open /admin, /judge and /m directly.	Redirected to sign-in; no protected data rendered.		
A8	Sign out	Click Log Out from the sidebar.	Session cleared; returned to sign-in; back button does not restore the portal.		

B. Organizations & Users

ID	Test	Steps	Expected result	Pass / Fail	Notes
B1	Create organization	Settings > Organizations > add a new organization with name and contact details.	Organization saved and appears in the list.		
B2	Create user requires org	Settings > User Roles > Create User, leave Organization blank.	Validation blocks submit until an organization is selected.		
B3	Organization search	In Create/Edit user, type part of an organization name in the org box.	Combobox filters as you type; selection persists after save.		
B4	Role filters	On User Roles, use the search field and role filter chips (Admin / Judge / Coach).	Table filters correctly; counts match the visible rows.		

ID	Test	Steps	Expected result	Pass / Fail	Notes
B5	Avatar upload	Edit a user, upload an avatar, save, then reload.	Avatar shows in the user table and in the sidebar for that user.		
B6	Delete user	Delete a test user.	User removed from list and can no longer sign in.		

C. Events

ID	Test	Steps	Expected result	Pass / Fail	Notes
C1	Create event	Events > New Event: name, dates, scoring open date, template.	Event appears in the events table with status Registration Open.		
C2	Inline status change	Click the status badge in the events table and pick another status.	Status updates instantly and persists after refresh.		
C3	Status behaviour	Move an event through Registration Open > Open for Capture > Open for Scoring > Completed > Archived.	Capture allowed only from Open for Capture onward; judges can score in Open for Capture and Open for Scoring; Completed/Archived hide judge messages and lock scoring.		
C4	Event edit	Change event name/dates and save.	Changes reflected on dashboard tiles, judge dashboard, and mobile coach list.		
C5	Dashboard tiles	Open Admin Dashboard.	Current Events and Upcoming Events tiles list the right events; Currently Online shows active users; card icons are brand teal.		

D. Registrations & CSV Import

ID	Test	Steps	Expected result	Pass / Fail	Notes
D1	Manual registration	Event > Registrations > Add Team with division, level and coach.	Team saved; Gym column auto-fills from the coach's organization.		
D2	Edit registration	Change a team's division and save.	Division updates in Registrations, Submissions, Scoring and Results views.		
D3	CSV import - clean file	Import a CSV where all organizations and coaches already exist.	All rows imported; summary counts match the file; no duplicates created.		
D4	CSV import - new org/coach	Import a CSV containing a new gym_name and a new coach email.	Organization auto-created; coach account auto-created and linked to that organization; team registered.		
D5	CSV import - bad data	Import a CSV with a missing division and a malformed email.	Row-level errors reported clearly; valid rows still import; invalid rows skipped.		
D6	Duplicate team name	Register two teams with the same name in one event.	System warns about duplicate names as designed.		

E. Scoring Templates, Rubrics, Divisions

ID	Test	Steps	Expected result	Pass / Fail	Notes
E1	Create template	Settings > Scoring Templates > create a template with a discipline.	Template is created and grouped under the correct discipline tab; list shows one template per line.		
E2	Sections & fields	Add sections and numeric fields with max points.	Total available points updates correctly.		
E3	Difficulty Driver field	Add a Difficulty Driver field with skills and radio option values.	Judge sees radio options per skill; selected values sum into the field score.		
E4	Execution Driver field	Add an Execution Driver field with a start value and technique-issue reductions.	Score = start value minus selected reductions, never below zero.		
E5	Auto comments	As a judge, select technique issues on an Execution Driver field.	Comments box gains a bold + underlined field header and a bold line per issue: 'Issue: -value'.		
E6	Template locking	Set an event to Open for Scoring, then try to edit its template.	Template is locked; edits blocked with a clear message.		
E7	Divisions & Levels	Settings > Divisions & Levels: add, edit and filter by discipline.	All Star Cheer and All-Star Dance divisions/levels list correctly.		
E8	Scoring Rubrics	Upload a rubric with a discipline; open Scoring Rubrics menu in admin and judge sidebars.	Rubric listed with its discipline; All-Star Cheer link opens unitedscoringpartners.com in a new tab.		

F. Judge Panels & Assignments

ID	Test	Steps	Expected result	Pass / Fail	Notes
F1	Create panels	Event > configure judge panels (e.g. B1, B2, SD).	Panels saved with their scoring responsibilities.		
F2	Assign panels dialog	Open Assign Panels; expand a division collapsible and assign judges to every section.	Green check icon appears on the division once fully assigned.		
F3	Bulk assignment	Use bulk judge assignment across multiple divisions.	Assignments applied; conflicts (same judge, same slot) are flagged.		
F4	Deductions judge	Assign a judge to the SD panel and open scoring as that judge.	SD judge sees only the deductions catalog, not other scoring sections.		

G. Mobile Capture App (Coach)

ID	Test	Steps	Expected result	Pass / Fail	Notes
G1	Coach login	Open /m on a phone and sign in as a coach.	Assigned events list loads.		
G2	Team list	Tap an event.	Teams list with instruction text 'Tap the Team name below to record and submit their performance for Scoring.'		
G3	Record flow	Tap a team, then Record. Check portrait and landscape.	Start button floats centered over the viewport; buttons stack cleanly with no truncated text; audio meter works.		
G4	Upload	Record a short clip and submit.	Upload progress shown; submission status becomes Uploaded; video lands in a Brightcove folder named after the event.		

ID	Test	Steps	Expected result	Pass / Fail	Notes
G5	Processing state	Open the submission immediately after upload in admin.	'Video is still rendering' placeholder with Check again / Try playback anyway, not a Brightcove error.		
G6	Playback after render	Wait for Brightcove processing, reopen the submission and the coach's team detail screen.	Video plays in both places.		
G7	Deadline	Set a video submission deadline in the past and try to upload.	Deadline enforced/communicated as configured.		

H. Judging

ID	Test	Steps	Expected result	Pass / Fail	Notes
H1	Judge dashboard	Sign in as a judge.	Assigned events grouped by event with 'Scoring opens ' or 'Scoring date TBD'.		
H2	Queue visibility	Check the scoring queue.	Only teams the judge is assigned to, in open events with a valid submission, are listed.		
H3	Score entry	Open a performance and enter scores using the +/- steppers.	Values change in the configured increments; running total shows points out of available points with no percentage.		
H4	Comment formatting	Use bold, italic, underline and spell check in the comments field.	Formatting markers applied and rendered on the scoresheet.		
H5	Save draft	Enter partial scores and Save Draft; leave and return.	Queue shows 'Draft Saved' with Resume Draft; values restored; admin sees draft status and can preview.		
H6	Submit scores	Submit a completed scoresheet.	Panel marked submitted; judge can no longer edit; admin sees submitted status.		
H7	Re-open for scoring	Admin re-opens the panel from the score review screen.	Panel returns to the judge's queue as a draft with prior scores intact; judge can edit and resubmit.		

I. Admin Score Review & Results

ID	Test	Steps	Expected result	Pass / Fail	Notes
I1	Score review dialog	Event > Scoring > open a submission.	Assigned judge shown as a badge; per-panel scores listed; video player embedded.		
I2	Admin override	Override a field score to 0 with a reason.	Override recorded with reason; totals recalculated; override visible on review and scoresheet.		
I3	Score maths	Compare a submission's totals by hand.	total = (sum of field points / template max points) x 100, minus the SD judge's total deductions (% Perfection). Event score equals % Perfection.		
I4	Deductions	Enter a 0.15 deduction as the SD judge.	0.15 is subtracted from the 100-point scale total, not averaged across judges.		
I5	Results publish	Publish results for an event.	Results become visible only after manual publish.		

ID	Test	Steps	Expected result	Pass / Fail	Notes
I6	Scoresheet PDF	Download a scoresheet PDF for a fully scored team and a partially scored team.	All template criteria rows always shown; unscored rows blank/greyed with max points; difficulty + execution for the same criterion share one row with a combined total.		
I7	Ranking reports	Event > Reports: generate Overall, By Level, and per-Division rankings.	Rankings ordered by % Perfection to 4 decimals; ties handled; PDFs open cleanly.		
I8	Scoresheet email	Trigger scoresheet distribution once all panels submit.	Email sent with correct branding/logo and the right scoresheet attached.		

J. Communication

ID	Test	Steps	Expected result	Pass / Fail	Notes
J1	Judge broadcast	Admin > Judge Broadcast: send a normal and an urgent message to an event's judges.	Teal banner for normal, red for urgent, appearing live for signed-in judges and on next login.		
J2	Message centre	Open the bell icon as a judge.	Unread badge count correct; messages listed; messages from Completed/Archived events hidden.		
J3	Coach review portal	Generate a review link and open it signed out.	Token URL loads the team's performances and scores read-only.		
J4	Bulk email	Use bulk email from Submissions to request videos or share review links.	Emails queued/sent to the right recipients with working links.		
J5	Email templates	Settings > Email templates: edit a template with variables and send a test.	Variables resolve; branding logo renders from the public asset bucket.		

K. Settings, Branding & API

ID	Test	Steps	Expected result	Pass / Fail	Notes
K1	Branding	Settings > Branding: upload a logo and change the primary colour.	Logo appears in sidebars and emails; theme colour updates across the portal after refresh.		
K2	Video providers	Switch the active video provider and save credentials.	Setting persists; uploads route to the selected provider.		
K3	Mobile API access	Settings > Mobile API Access > View API Access.	Base URL and anon key shown; reveal/copy buttons work; example curl matches the live URL.		
K4	Test script download	Settings > Testing & QA: download the PDF, Markdown and CSV checklist.	All three files download and open correctly.		
K5	Notifications	Toggle notification settings and save.	Values persist after reload and drive the matching emails.		

L. API Endpoints (developer smoke test)

ID	Test	Steps	Expected result	Pass / Fail	Notes
L1	/login	POST with apikey header and coach credentials.	200 with a 64-character session token.		
L2	/me	GET with Authorization: Bearer .	200 with the coach profile and organization.		
L3	competitionList / mobile-coach-events	GET with a valid token.	Only events assigned to that coach returned.		
L4	mobile-coach-teams	GET for an event.	Teams owned by the coach (matched by coach_user_id or coach_email) returned.		
L5	brightcove-upload-init / -complete	Run an upload handshake for an email-matched coach.	Both calls succeed; no ownership rejection.		
L6	Unauthorised access	Call any endpoint with a missing or expired token.	401 with a clear error body; no data leaked.		
L7	/logout	POST with a valid token, then reuse the token.	Token invalidated; subsequent calls return 401.		

M. Cross-cutting & Regression

ID	Test	Steps	Expected result	Pass / Fail	Notes
M1	Responsive layout	Check admin, judge and coach views at 375px, 768px and 1440px.	No overflow, unreadable text or clipped buttons.		
M2	Sidebar collapse	Collapse and expand the admin and judge sidebars.	Icon-only mode with tooltips; nested Events/Settings menus behave correctly.		
M3	Permissions	As a judge or coach, attempt to load an admin URL directly.	Access denied / redirect; no admin data returned.		
M4	Data integrity	Change a team's division after scores exist.	Scores and template association behave as expected; verify scoresheet still renders.		
M5	Console errors	Keep the browser console open through a full pass.	No uncaught errors or failed network requests.		
M6	Offline/slow network	Throttle the network during a mobile upload.	Graceful error and retry; no duplicate submissions.
