Judge Manual

A reference guide to scoring in the judge portal:
your queue, the scoresheet, drafts, deductions, and your account settings.

Contents

1. Getting Started for Judges

3. Scoring a Performance
4. Save Draft & Resuming
5. Deductions (SD) Panel
6. Score History
7. Rubrics
8. Settings & Password
9. Broadcast Messages

1. Getting Started for Judges

Your dashboard lists the events you have been assigned to, along with the date scoring is scheduled to open for each one.

- Dashboard - your assigned events and when scoring opens.
- Scoring Queue - the teams waiting for your score.
- Score History - every score you have submitted.
- Rubrics - the published rubric for each discipline.
- Messages - broadcasts sent by the event administrator.
- Settings - your name, photo, and password.

> *If an event is not visible yet, the administrator has not opened it for capture or scoring. The scoring open date on your dashboard tells you when to expect it.*

2. Scoring Queue & Panel Assignments

Your queue shows one card per panel assignment - not per team. If you hold two slots for the same team (for example building difficulty and building execution), you get two cards and score them separately.

- Each card shows the team, division, your panel slot, and its current status.
- A card only appears once the team has a playable video.
- Cards marked Draft Saved can be resumed where you left off.
- A card that returns to your queue after you submitted it was re-opened by an administrator for a correction.

3. Scoring a Performance

Open the card from your queue. The video plays beside the scoresheet. Work down the criteria assigned to your panel slot, add any comments in Comments & Feedback, then Save Draft to pause or Submit when you are finished.

Field types

- Numeric score - use the + and - buttons to step the value, usually in 0.5 increments, up to the field maximum.
- Difficulty driver - select one value per listed skill. The field total is the sum of what you selected.
- Execution driver - the field starts at a set value. Select the technique issues you observed; their reduction values come off the start value and the score never goes below zero.

> *Automatic comments: each technique issue you select on an execution driver adds a line to Comments & Feedback under that field's name, in the form "technique issue: point value removed". You can add your own notes around it.*

You see points scored out of points available for your slot. Percentages are not shown per judge - the percentage is only calculated once the whole panel is combined.

> *Submitting is final from your side. If you need to change a submitted score, ask the administrator to re-open the panel; your entries are preserved.*

4. Save Draft & Resuming

- Save Draft stores everything you have entered without submitting it.
- The card in your queue shows a Draft Saved badge and a Resume Draft action.
- Drafts do not count toward results or reports until you submit.
- Administrators can see that a draft exists and preview it, but cannot change it.

5. Deductions (SD) Panel

Deductions are a separate panel assignment held by one judge. If you hold that slot, you see the deductions catalogue for the team instead of the standard criteria.

- Select each deduction observed; the total is recorded against the team.
- Deductions are subtracted from the converted 100-point score, not from raw points.
- Judges on other slots do not see deduction controls at all.

6. Score History

Score History in the sidebar lists every score you have submitted, with the event, team, division, and your panel slot.

- Submitted scores are read-only - you cannot edit them here.
- If a score needs correcting, ask the administrator to re-open the panel; it then reappears in your Scoring Queue with your entries preserved.

7. Rubrics

The Rubrics item in the sidebar opens a list of disciplines. Select the discipline you are judging to open its published rubric. A reference sheet is also available from within the scoring screen so you can check wording without losing your place.

8. Settings & Password

Open Settings from the bottom of the sidebar, just above Log Out.

- Profile - set your full name and upload a photo (PNG or JPG, up to 5MB). Your photo appears in the sidebar and on your scores.
- Change Password - enter your current password, then your new one twice. New passwords must be at least 8 characters.
- Your email address cannot be changed here - contact your administrator.

If you have forgotten your current password, sign out and use the password reset link on the sign-in page instead.

9. Broadcast Messages

- Messages drop down from the top of the screen while you are logged in.
- Anything sent while you were away appears when you next sign in.
- Dismiss a message to clear the banner; it stays available in your messages menu.
